The Newsletter of the Lakewood Village Neighborhood Association

June 2011 Volume 55 Number 6 Sunnyvale, California Editor: Phyllis Fowler

Monthly Meeting Wednesday,

At 7:00 pm in the Lakewood Park Building

Guest speakers from :

Neighborhood Preservation and Public Works

President's Column

-Judy Fernandez

Dear Neighbors.
Our May meeting was very informative. We had a guest speaker from the SNAP program (Sunnyvale Neighbor's Actively Prepared) and our NRO Jim Davis (Neighborhood Resource Officer).
Dan Walsh told us about SNAP training He explained how important it is to prepare for emergencies. Some of the good advise we received was:

- Plan to have enough water for 3 days for each person in your household. Keep the water in a dry, out of sunlight place. To protect the water from microorganisms, use a small amount of bleach in the water. This will protect the water for a shelf life of up to 1 year. The formula is 4 drop's of bleach in 1quart water, 16 drops of bleach in 1 gallon of water.
- Leave a pair of shoes next to your bed so you can get out of the house without stepping on broken glass.
- Have a portable radio and flashlight. With extra batteries! (*I have found wind-up/solar powered radios at OSH and Lowe's. Editor*)
- Make yourself a to-go bag with meds, food, and special papers you might need.
- Keep cash in a safe place, remember the ATM's will not work if we have power outages.
- If you have pets make sure you have a to-go bag for them as well.

Dumpster Monitors Needed!

by Skip Gottschalk

The ***2011 Lakewood Village Dumpster Day*** is scheduled for ***Saturday July 16th***. The LVNA Board would like to see more/ different locations of the dumpsters to better serve our neighborhood.
To do this we need more **Dumpster Monitors**.
Our **Monitors** are the main reason this event has been so successful! A **Dumpster Monitor** accepts the responsibility to watch over the dumpster to ensure that our neighborhood abides by the *City of Sunnyvale* rules.
(*Continued on page 4)*

Stroke Signs and Risk Factors

By Judy Fernandez, Joan Simon and Phyllis Fowler

Recently during my walk, I saw a long time neighbor and she mentioned that she had just had a stroke. With the recent death of Helen Lane and my neighbor's experience, I thought it might be appropriate to talk about the signs and risks of **Strokes.**

Signs of a Stroke:

Sudden numbness or weakness of the face, arm, leg and especially on one side of the body.
Sudden confusion, trouble speaking or understanding.
Sudden trouble seeing in both eyes
Sudden trouble walking, dizziness loss of balance or coordination
Sudden severe headache with no known cause
Make note of the time of the onset of your symptoms. If you receive proper medication within 3 hours of the stroke, your chances of long term disability may be reduced.

AARL Ham Radio Contest

By Phyllis Fowler, KE6IFQ

Have you ever heard the term *Ham Radio* and wondered what it means?
A Ham radio operator can communicate from the top of a mountain, their home or behind the wheel of their car. They can take radio wherever they go! In times of disaster, when regular communications channels fail, hams can swing into action assisting emergency communications efforts and working with public service agencies. At other times, they can talk to Shuttle astronauts or bounce signals off the moon. They can use telegraphy, voice, digital, even images in communication with other hams. Know any other hobby with so much to offer?
Back in the 1890s, when Guglielmo Marconi began his experiments in wireless telegraphy, he could not have imagined the enthusiasm for Amateur Radio. The United States government began licensing Amateur Radio operators in 1912. Within two years there were thousands of "Hams" and the American Radio Relay League (ARRL) was founded. Currently the ARRL has over 156,000 members in the US.
ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. Each year over 35,000 amateurs gather with their clubs, friends or simply by themselves to talk to as many other Ham radio operators as they can. Field Day is a time where many aspects of Amateur Radio come together to highlight our many roles. While some hams will treat it as a contest, most groups use the opportunity to practice their emergency response capabilities.
On **June 25th and 26th** you can see our local "Hams" in action! The Sunnyvale Amateur Radio Emergency Service (**SARES**) will be running "Field Day" at Raynor Park. Field Day starts at 6:00pm and it runs for a continuous 24 hours. The guys and gals will try to log as many contacts as they can! Yes, I said gals! You may have noticed what looks like a license plate at the end of my name. It is my amateur radio license! Fred and I have both been "hams" since 1990! Come down to Field Day and see what all the fun is about! ◆

"I am often asked how radio works. Well, you see, wire telegraphy is like a very long cat. You yank his tail in New York and he meows in Los Angeles. Do you understand this? Now, radio is exactly the same, except that there is no cat."
Attributed to Albert Einstein

Alert 1680 AM
Sunnyvale's Emergency Radio Station

There is a new radio station on the AM dial in Sunnyvale, but you won't be able to hear your favorite tip-40 song on this station. Instead, you will hear important safety information during local, regional or national emergencies. **Alert 1680** is now in operation at 1680 AM on your radio dial. This radio station is the brainchild of the **Sunnyvale Department of Public Safety's Office of Emergency Services and the Sunnyvale Amateur Radio Emergency Service (SARES)**. Funding for the system was made possible through a grant provided by the US Department of Homeland security.
Alert 1680 will broadcast weather information provided by the *National Oceanic and Atmospheric Administration* 24-hours a day. If important information needs to be broadcast to the residents in the community.
You will soon see signs around the community about **Alert 1680.** ◆

Stroke Signs and Risk Factors

(Continued from page 1)

Risk Factors:

Age — Your chance of having a stroke doubles for each decade of life after age 55. While stroke is common among the elderly, a lot of people under 65 also have strokes.

Heredity (family history) — Your stroke risk is greater if a parent, grandparent, sibling has had a stroke. Some strokes may be symptoms of genetic disorders

Race —African Americans have a much higher risk of death from a stroke than Caucasians, partly due to the higher risks of high blood pressure, diabetes and obesity.

Sex (gender) — Stroke is more common in men than in women. However, more than half of all stroke deaths occur in women.

Prior stroke, TIA or heart attack — The risk of stroke for someone who has already had one is many times that of a person who has not. Transient Ischemic Attacks (TIA) are "warning strokes" that produce stroke -like symptoms but no lasting damage. TIAs are strong predictors of stroke. A person who's had one TIAs is 10 times more likely to have a stroke. Recognizing and treating TIAs can reduce your risk of a major stroke. TIA should be considered a medical emergency and followed up immediately with a healthcare professional.

High blood pressure —is the leading cause of stroke and the most important controllable risk factor for stroke. Many people believe the effective treatment of high blood pressure is a key reason for the accelerated decline in the death rates for stroke.

Cigarette smoking —The nicotine and carbon monoxide in cigarette smoke damage the cardiovascular system in many ways. The use of oral contraceptives combined with cigarette smoking greatly increases stroke risk.

Diabetes —Many people with diabetes also have high blood pressure, high blood cholesterol and are overweight. This increases their risk even more. While diabetes is treatable, (*continued on page 5)*

Electronics Recycling

By Phyllis Fowler

I recently received a flyer on my front doorstep regarding "Free Electronics Recycling." The flyer went on to list electronic items to leave in a bag on my driveway. I tossed the flyer in my recycle bin and didn't think about it again. That is until Judy Fernandez shared some information she received from **Sunnyvale's Public Works/Solid Waste Division!**

According to **Sandy Jensen**, *Residential Recycling Coordinator*, these "fly by night scavengers" are questionable. If the items collected are taken to a certified electronics recycler for proper dismantling and recycling, then there's no problem. However, many of these collectors are scavengers interested in only extracting precious metals contained in the electronics and tossing away the rest of the item. Leftover materials often end up in someone's backyard in another country. Electronic waste is considered hazardous waste, because these metals are known to pose serious health risks to people and the environment.

These collectors usually will drop flyers and pick up within a day or two to avoid being caught. Phone numbers are quickly disconnected or changed to prevent tracking them down. Which is a pretty good indication that they are not certified and their intentions are not to recycle, but to mine for trace metals!

Sunnyvale's **SMaRT Station** is a certified electronics collector and is not far from our neighborhood. I have dropped old monitors, florescent light bulbs, used batteries and other old electronic junk off at the **SMaRT Station**. It didn't take very long and was as simple as driving up, unloading my junk and driving off! I even dropped off some cardboard at the same time.

Remember it is illegal to place electronics in recycling or trash bins (or dumpsters). However, electronics can be placed curbside for **On-Call collection**. To schedule a collection appointment, call (408) 730-7400 or go the City's website: http://sunnyvale.ca.gov/Departments/PublicWorks/GarbageRecyclingandWasteReduction.aspx . To check if a company is a certified electronics recyclers in California, go to www.calrecycle.ca.gov .

Stay safe and keep recycling! ◆

Dumpster Monitors Needed!

(Continued from page 1)

Keeping an eye on what can and can not be placed in the dumpsters is the reason we continue to be supported by the City. It seems that a lot of monitors also know how to turn the day into a nice neighborhood party (any reason is a good one!!!!!).

If you are interested in becoming a **Dumpster Monitor** and having a dumpster placed on your street. Please come to the next ***LVNA General Meeting on June 13th at 7:00pm, Lakewood Park building***

or contact an LVNA Board member:

California Theatre Center's Summer Rep 2011

Performances are June 2nd – July 24th
Sunnyvale Theatre at the Sunnyvale Community Center

Around The World in 80 Days
Hold onto your seats for the original "amazing race"! Join fearless adventurer Phineas Fogg with his ever resourceful servant Passepartout as he sets out to circle the globe in an unheard of 80 days! Danger, romance and comic surprises abound in this whirlwind of a show as six actors portraying 39 characters traverse seven continents!

The Emperor's New Clothes
A delightful comedy for the young-at-heart about an Emperor who hires two tailors who promise him the finest suit of clothes in the world from a fabric invisible to anyone who is unfit for his position or "just hopelessly ignorant."

The Servant of Two Masters
This farce has been entertaining audiences around the world for almost 300 years. The wily Tuffaidino, decides that the only way to survive during difficult economic times is to get two jobs. He becomes servant to two masters, but he cannot let either master know that he owes allegiance to another! What results is a fast-paced comedy filled with intrigues, disguises, mistaken identities and even romance! This zany delight will be a great entertainment for a war, summer night.

Agatha Christie's Black Coffee
In 1934 Poirot responds to an urgent call from atomic physicist Sir Claud Amory. Sir Claud fears that a member of his own household plans to steal his secret formula for a bomb that will cause mass devastation. Poirot discovers a puzzling brew of despair, treachery and murder – a mystery which only the cleverest of detectives can unravel!
(Editor's note– Fred and I have enjoyed the plays put on by the CTC for several years. I am looking forward to this season!)

Visit the CTC website at www.ctcinc.org for the schedule of all the Summer Rep 2011 performances!

Single ticket prices range from $10 to $25. thicket coupons in sets of 6 tickets fro $90 or 12 tickets for $160 are also available (valid for any performances in any combination) ◆

Stroke Signs and Risk Factors

(Continued from page 3)

the presence of the disease still increases your risk of stroke.

Carotid or other artery disease — The carotid arteries in your neck supply blood to your brain. A carotid artery narrowed by fatty deposits from atherosclerosis (plaque buildups in artery walls) may become blocked by a blood clot.

Peripheral artery disease is the narrowing of blood vessels carrying blood to leg and arm muscles caused by fatty buildups of plaque in artery walls, which raises risk of stroke.

Other heart diseases —also raise the risk of stroke.

High blood cholesterol — causes an increased risk for stroke.

Poor diet- Diets high in saturated fat, trans fat and cholesterol can raise blood cholesterol levels. Diets high in sodium (salt) can contribute to increased blood pressure. Diets with excess calories can contribute to obesity. However, a diet containing five or more servings of fruits and vegetables per day may reduce the risk of stroke.

Physical inactivity and obesity — both can increase your risk of high blood pressure, high blood cholesterol, diabetes, heart disease and stroke. So go on a brisk walk, take the stairs, and do whatever you can to make your life more active. Try to get a total of at least 30 minutes of activity on most or all days.

Alcohol abuse — Alcohol abuse can lead to multiple medical complications, including stroke. For those who consume alcohol, a recommendation of no more than two drinks per day for men and no more than one drink per day for non-pregnant women.

Drug abuse —Drugs including cocaine, amphetamines and heroin, have been associated with an increased risk of stroke. Strokes caused by drug abuse are often seen in a younger population.

Although heart disease and stroke account for the vast majority of deaths each year in America, you can do things to lessen your risk: eat a healthy diet, exercise every day, stop smoking and know your blood pressure. For more information go to American Heart Association website: www.americanheart.org ◆

President's Column

(Continued from page 1)

He passed out some wonderful handouts about getting prepared for emergencies. I have a few of the handouts left, if you would like one just email me or go to http://earthquake.usgs.gov to find out more about earthquakes and preparing for them. The next SNAP training is coming up Sept. 22nd, classes are once a week for 7 weeks, from 6:30p,-9:30pm. Call Public Safety (408) 730-7190 or email: SNAP@ci.sunnyvale.ca.us for more information.

Our second speaker Officer Jim Davis has agreed to come to every monthly meeting for questions and answer time from our neighbor's. He told us that the crime rate in North Sunnyvale has decreased, except for abandoned cars on the Fairwood side. He reported that there will be no Officers laid off this year. However, if the budget doesn't improve, the City could be out of money in 10 years.

One neighbor asked about the public serving as crossing guards at our schools. Officer Davis replied that currently there are parents at Ellis and Cumberland doing just that. If you are interest in forming a group to help out the schools with this issue, please contact me and I will pass your name to Mr. Mumy, who would like to start a program for next year.

Our next meeting will be Neighborhood Preservation and Public Works. They will discuss the results of our survey and hopefully gets things moving in the direction that the majority of the neighbor's are asked for from the survey. The results were as follows:

1. Major Grocery Store
2. Speed Bumps on Selected streets
3. Side walk repairs
4. Road opening at Lakehaven and Fairoaks
5. Cars packing at corners
6. Blinking crosswalk lights a Lakehaven/Silverlake
7. Sun Newspaper Distribution

Pease mark your calendar for June 8th at 7:00 at Lakewood park. Please contact me at our new email address if you have comments or questions. lakewoodconcerns@hotmail.com ◆
